- Second visit for appropriate procedures. Great experience because of experienced Care Givers with a positive, friendly attitude.
- The doctor and all the staff were professional, friendly, caring and took great care of me before, during, and after my procedure. I felt comfortable and confident in my care. Thanks to Dr. Kondapalli, Kelly, Melanie, Lori, Debra, Kathy, and Desiree.
- everyone was great .. anesthesia person was special . . sucks that the doctors who own the facility don't offer coffee, juice and crackers after recovery - if juice is offered then someone screwed up the order and it did not yet arrive
- Timing had me finishing my prep at 2AM for a 9AM appointment. There may be better, more effective prep methods allowing for more sleep.
- All my medical staff were fantastic! Robert, Brenda, Bryan, Kathleen, Tammy & Genieva. Sarasota at Venice has been very good experiences despite needing procedures. Thank you all!
- Everyone was friendly and professional from beginning to next day follow up. My colonoscopy went smoothly. The only constructive feedback I have - maybe spend a little more on TP. I am guessing that by the time most people get to your waiting room, they might be a little sore in the rear.
- No pain, no discomfort everything on time. Whole thing went better than I could have expected. Doc and team were great.
- Excellent professional, friendly service, your facility is the BEST A+++++++
- I received excellent care, from check in to discharge. Everything was explained clearly to me and it was a seamless experience.
- Dr Barth is a caring professional who listens and answers any questions or concerns. The staff at the center are friendly and professional.
- Staff was WONDERFUL. I'm very impressed with the care I received. Only drawback was it all seemed very rushed. Other than that staff was extremely friendly and personable. Made you feel comfortable with them.
- I especially want to commend Lori, who prepped me prior to my procedure. Also, Gail who was the anesthetist was also very caring and took time to explain everything.
- Very professional. In and out very quickly. No complications. The procedure went very smoothly.
- From the initial consultation visit with the doctor, to scheduling and the procedure to leaving, everyone you meet through the whole process were absolutely friendly, compassionate, professional and very concerned for my well being. Everyone was absolutely phenomenal !!!!!!!
- Everyone was professional, the facility was clean , both physician and staff introduced themselves and explained their roles. Smoothest colonoscopy ever!

- Highly recommend this Endoscopy Center for GI procedures! From the registration to discharge all was top notch. Special Thanks to the nurses(Lori and RR),my anesthesiologist and Doctor Agnello! - I'm deaf. They were very much aware and made sure I understood them clear. Very nice people
- Very positive experience. All staff members I came in contact with friendly, professional, and showed a genuine care of me as a patient, especially the nurses. That said, every employee I came in contact with were GREAT!
- Overall great experience at this location! Everyone is friendly, helpful and professional.
- The experience was so much better than my previous Gastro doctor that I can't say enough great things about Dr. Kondapalli and the staff.
- Energy in office was perfect. Everyone was kind and professional. Good experience.
- Overall team was outstanding in my care and communication
- I was the last appointment of the day, so I cannot be too critical of the wait time for the procedure. Complications happen, it is out of the control of the Dr. to stay on schedule.
- Gulf Coast Endoscopy surgical center is always thorough, efficient and extremely courteous. The team at Gulf Coast Endoscopy all work together in a collaborated effort to make you feel as comfortable but yet understand the importance of time. This is extremely valuable to those who are employed and do not have extra time to take off work for procedures.
- Everyone at the center was very professional, efficient and compassionate. Many healthcare facilities today make you feel like just a number coming through the system. This was NOT the case here. All the staff were very empathetic and treated you like an individual. They put me at ease from the beginning!!! I would highly recommend this center to anyone.
- Everyone on staff was welcoming, caring and friendly, from my check-in, to pre-op, to the procedure staff and post op. I appreciated the next day follow up call as well.
- Great nurses and doctors on staff. Made sure to keep me informed and comfortable throughout the entire procedure. Thank you so much.
- Great staff all around. Dr. Taylor was very patient and informative. Pre and post op staff were amazing. everything was smooth and I left with no unanswered questions or concerns.
- I had a very positive experience. I was given excellent care! I appreciate how kind and helpful everyone was.
- Would have liked wife to wait in room with me until procedure time as it was very boring other than that everything great
- Overall, an excellent process. Everything was very efficient and done in a timely professional manner. Only negative comment I have is that the discharge staff was probably understaffed and the discharge nurse had so many patients and so little time to be able to spend with each patient. Still she did any excellent job "keeping up" with my questions. I'd recommend the center highly.
- This is a very stressful test to have to endure, from prep, to anesthesia(being put out), IV, & then after math. The women/nurses here & my Dr. could not have been kinder. I felt relieved about that aspect, especially with the stress of having to be there in the first place & not having control over anything, especially the out come of very invasive procedure!

- I was treated so well. I had Lori in preop and she got my IV on the 1st stick (very rare for me in the past) and was so caring. I absolutely loved Robin's (CRNA) sense of humor and she made me feel so relaxed before, during, and after the procedure. I think I had Beth for recovery and again very caring and thoughtful. And, Dr Taylor was awesome in her ability to make me feel that the team would care for me through the procedure. While having a GI procedure isn't ideal, having a team of professionals who are caring, thoughtful, and proficient at their task sure makes the experience easier to face. Great job!
- Everyone was friendly and professional. This facility appears to be well staffed by competent professionals.

Patient Testimonials

- One comment on this survey. I designed surveys for a living. A major no-no is to attribute a negative response with a higher value than a positive. Poor should be 1 and Excellent should be 5. Also, natural tendency is to see value from left to right. therefore Poor response start on the left and positive end on the right. Otherwise you may have false readings from people who complete the survey with those assumptions. Just sayin'.
- Everyone was pleasantly friendly and made me feel good. Professional and safe.
